

# Load the Analysis ToolPak in Excel

*Applies To: Excel 2016, Excel 2013, Excel 2010, Excel 2007, Excel 2016 for Mac,*

If you need to develop complex statistical or engineering analyses, you can save steps and time by using the Analysis ToolPak. You provide the data and parameters for each analysis, and the tool uses the appropriate statistical or engineering macro functions to calculate and display the results in an output table. Some tools generate charts in addition to output tables.

The data analysis functions can be used on only one worksheet at a time. When you perform data analysis on grouped worksheets, results will appear on the first worksheet and empty formatted tables will appear on the remaining worksheets. To perform data analysis on the remainder of the worksheets, recalculate the analysis tool for each worksheet.

## **Windows**

## **Mac**

1. Click the **File** tab, click **Options**, and then click the **Add-Ins** category.

If you're using Excel 2007, click the **Microsoft Office Button**  , and then click **Excel Options**

2. In the **Manage** box, select **Excel Add-ins** and then click **Go**.

If you're using Excel for Mac, in the file menu go to **Tools > Excel Add-ins**.

3. In the **Add-Ins** box, check the **Analysis ToolPak** check box, and then click **OK**.
  - If **Analysis ToolPak** is not listed in the **Add-Ins available** box, click **Browse** to locate it.
  - If you are prompted that the Analysis ToolPak is not currently installed on your computer, click **Yes** to install it.
